- I sistemi di fissaggio (viti + tasselli) sono idonei per impiego su pareti compatte o in laterizio forato. Per pareti in materiali diversi è responsabilità dell'installatore adottare sistemi di fissaggio appropriati.
- The fixing kits (screws and dowels) are suitable for compact wall or hollow bricks. For wall in different materials it is responsibility of the installer to use appropriate fixing.
- Les systèmes de fixation (vis + chevilles) sont aptes à être utilisés sur des parois compactes ou en briques creuses. Pour des parois avec des matériaux différents, la responsabilité sera de l'installateur qui devra utiliser des systèmes de fixation appropriés.
- Die Verbindungselemente (Schrauben + Dübel) sind für den Einsatz in kompakten oder hohlen Ziegelmauern. Bei Einsatz in unterschiedliche Materialien liegt in der Verantwortung des Installateurs geeignete Verbindungselemente einzusetzen.
- Los sistemas de fijación (tornillos + tacos) son adecuados para uso en paredes compactas o de ladrillo hueco. Para paredes de material diferente el instalador debe adoptar los sistemas de fijación pertinentes.

- Sisteme de fixare (șuruburi + dibluri) sunt adecvate pentru folosirea pe pereți compacți sau din cărămizi goale. Pentru pereți din materiale diverse este de responsabilitatea instalatorului să adopte sisteme de fixare adecvate.
- Uchycovací systémy (šrouby + hmoždinky) jsou vhodné pro použití na plných stěnách nebo na děrovaných cihlách. U stěn z jiných materiálů instalatér nese odpovědnost za zvolení vhodných uchycovacích systémů.
- Systemy mocowania (śruby + kołki) nadają się do stosowania w ścianach z cegły lub z pustaków. W przypadku ścian wykonanych z innych materiałów, obowiązkiem instalatora jest dobrać odpowiednich systemów mocowania.
- Крепежные элементы (винты+дюбеля) предназначены для использования на компактных стенах или перфорированном кирпиче. Для стен, изготовленных из другого материала, монтажник должен использовать соответствующие крепежные элементы.
- Spojovací materiál (skrutky + klíny) je vhodný pre použitie u kompaktných alebo dutých tehlových stien. V prípade stien z iných materiálov je na zodpovednosti inštalátora, aby zvolil najvhodnejší spojovací materiál.
